Re: Aircraft Noise Competent Authority Notice arising from application for planning permission at Dublin Airport (ref. F19A/0449) – Proposed change of use to provide for an increased combined passenger capacity for all passenger buildings from 32 million passengers per annum (mppa) to 35 mppa (of which 3 mppa will be connecting passengers).

Dear Ms Dalton

We refer to the letter from Tom Phillips & Associates on behalf of Dublin Airport Authority (daa) dated 27 January 2020, seeking a six month extension of time to respond to the Aircraft Noise Competent Authority's (ANCA) request for information dated 19 December 2019 (**Information Request**).

ANCA requires certain preliminary and methodological information before it can determine whether to grant the requested extension. Please confirm within 14 days of this Notice that the following information will be furnished by daa, on or prior to **31 March 2020**:

- Noise Modelling Methodology Report;
- Population and Demographic Methodology Report;
- Exposure and Effects Methodology Report; and
- A sample of the Noise Modelling, Population and Demographic information and Exposure and Effects information in relation to the 'Current Situation' scenario (being Scenario 'A' as outlined in paragraph 1.4 of the Appendix to the Information Request). This information is being requested so that ANCA and its technical advisors can satisfy themselves as to the format in which the requested information is to be provided.

Following receipt of the information specified above, ANCA will determine your request for a six month extension to the Information Request response.

Yours sincerely

Joe Mahon
Aircraft Noise Competent Authority
