INTRODUCTION

Welcome to the Fingal Biodiversity Events programme for April - June 2024.

We have a wide range of walks, talks and webinars throughout the county on offer, particularly during Biodiversity Week in May.

This year's programme begins on the 24th April with a webinar on the woodland management plan for the woodlands at St. Catherine's Park in Lucan, where Faith Wilson will talk about upcoming woodland management measures to protect one of the oldest woodlands in Dublin. We will also have webinars coming up on the restoration of the Ward river in Swords and the very successful Goat grazing project on Howth.

If you like being active, why not join us for a kayaking excursion on the Royal Canal with Kayaking.ie or go on a Safari in Howth with Shanes Howth Adventures? If you want to learn more about nature in your area, why not join one of the bird walks under the expert guidance of Birdwatch Ireland, go whale watching or frog hunting in Howth, search for plants and wildlife in St. Catherine's Park or go and see the Dublin Bay Biosphere by boat.

And finally, we have outings for the little ones too, where OWLS is organising a series of family outings in the Turvey Nature Park in Donabate.

We look forward to seeing you at one of our outings! If you have any suggestions and ideas for walks, talks or events, please get in contact with us on biodiversity@fingal.ie.

This annual event, now in its 22nd year, comprises free and guided whale watches at local headlands and vantage points, as part of All-Ireland whale watch day. These simultaneous land-based watches at 11 sites around the Irish coast provide IWDG researchers, whale enthusiasts and Citizen Scientists alike with a unique overview of whale and dolphin activity on the day and you can play an important part. While there are no guarantees of sightings, given reasonable weather you have a good chance of seeing some of the marine species that can be viewed locally.

This event is suitable for all ages and is aimed at everyone from the novice wildlife enthusiast to the experienced naturalist. We advise participants to dress appropriately for the weather conditions on the day. There may be a short, elevated walk from the meeting point to your watch site, so sensible footwear is recommended, and your local watch may not be wheelchair accessible.
